EXPERIENCE

SOC Analyst

May 2025 – Present

Auxillium

- Contributed to securing Auxillium's AWS-hosted eLearning platform by **monitoring cloud/application logs**, reviewing traffic patterns, and applying detection rules to protect sensitive user data.
- Configured and worked with **SIEM log ingestion**, WordPress security plugins, and endpoint telemetry—strengthening my hands-on understanding of **security monitoring, alert triage, and threat detection**.
- Assisted in improving platform resilience through **IP filtering**, anomaly detection, and basic incident response practices, reinforcing my knowledge of **defensive security workflows** and **cloud security principles**.
- Documented findings, risks, and remediation steps in a structured format, developing strong habits in **security documentation, process discipline, and continuous improvement**.

Security Consultant

Jan 2025 – April 2025

DCS Consulting Services

- Supported a major **SOC 2 Type II compliance initiative** by performing IT risk assessments, analyzing existing controls, and validating security documentation.
- Helped design and optimize **annual audit processes**, creating repeatable procedures that reduce operational overhead and accelerate audit completion.
- Collaborated directly with leadership to strengthen **governance, process maturity, and security control alignment** with SOC 2 requirements.

Cybersecurity Everyday

August 2025 – Present

Personal Blog

- Share practical cybersecurity concepts through accessible write-ups designed to teach newcomers, simplify complex topics, and inspire others to explore defensive security.
- Document hands-on labs and personal security builds—such as network filtering, threat detection exercises, and system hardening to both solidify my own learning and provide clear guides others can follow.

EDUCATION

Carleton University

Ottawa, ON

Bachelor of Science in Computer Science

Sept. 2022 – (expected) May 2026

TECHNICAL SKILLS

Languages: Python, Bash, SQL, Java, JavaScript, C++, HTML/CSS

Frameworks & Methodologies: MITRE ATT&CK, NIST CSF, Cyber Kill Chain, Incident Response Lifecycle

SIEM & Monitoring Tools: Splunk, Elastic Stack

Security Tools: Wireshark, Sysmon, Nmap, Nessus, OpenVAS

Networking & Protocols: TCP/IP, DNS, HTTP/HTTPS, VPNs, Firewalls, Proxy, SSH

Endpoint & Threat Defense: CrowdStrike Falcon, Threat Analysis, Vulnerability Management

Cloud & Virtualization: AWS, Azure, Docker, VMware, VirtualBox

Operating Systems: Windows, Linux, macOS

Version Control & Automation: Git, GitHub

CERTIFICATIONS

CompTIA Security+

Issued by CompTIA

CompTIA Network+

Issued by CompTIA

PROJECTS

SOC Home Lab – Detection & Monitoring | *Splunk, Sysmon, Windows, Linux*

- Built a fully operational **SOC environment** using **Splunk Enterprise** and **Sysmon** to collect, parse, and analyze endpoint telemetry across multiple virtual machines.
- Simulated attacks and created **MITRE-mapped detections**, improving skills in **SIEM** operations, threat investigation, and log-based detection engineering.

Security Automation Lab | *Linux, AdGuard Home, Python*

- Built a secure sandbox environment hosting a **local offline AI agent** and deployed **network-wide DNS filtering** with AdGuard Home to block ads, trackers, and malicious domains while enabling automation and privacy-focused experimentation.

AWS Cloud Infrastructure Deployment | *AWS, Docker, VPC, IAM*

- Implemented a containerized web app using **ECS, VPC, IAM roles, and encrypted S3**, with CI/CD automation and cloud monitoring controls.
