EDUCATION

Carleton University

Bachelor of Science in Computer Science

Ottawa, ON

Sept. 2022 – Expected May 2026

TECHNICAL SKILLS

Languages: Python, SQL, Bash, Java, HTML/CSS

Frameworks: MITRE ATT&CK, NIST CSF, Cyber Kill Chain

SIEM Tools: Splunk, Elastic Stack

Security Tools: Wireshark, Sysmon

Networking: TCP/IP, DNS, HTTP/HTTPS, VPNs, Firewalls

Cloud Platforms: AWS, Azure

CERTIFICATIONS

CompTIA Security+

In Progress

CompTIA Network+

In Progress

EXPERIENCE

Cybersecurity Blog Author

2025 – Present

Medium

- Publish blog posts on **threat hunting**, **SIEM detections**, and **network security**, reaching a growing audience of readers.
- Document hands-on experiments with **Elastic Stack**, **Sysmon**, and **Windows Event Logs**.
- Develop ability to explain complex cybersecurity concepts in clear, accessible language.
- Research and summarize emerging cybersecurity threats and defensive techniques to strengthen technical knowledge.

Data Analyst Intern

May 2024 – Aug. 2024

Generac

- Analyzed and interpreted large datasets using **Python** and **SQL** to uncover trends and support data-driven decision-making across departments.
- Designed and built interactive dashboards in **Tableau/Power BI** to visualize **KPIs**, improving stakeholder understanding and reporting efficiency.
- Automated data cleaning and preprocessing workflows, reducing manual effort by **40%** and increasing accuracy.

RECENT PROJECTS

Threat Hunting Dashboard | Python, Elastic Stack, Sysmon, Windows Event Logs

- Collected and ingested **Windows Event Logs** and **Sysmon telemetry** into the **Elastic Stack** for centralized analysis.
- Created and fine-tuned detection queries for suspicious process creation, privilege escalation, and lateral movement based on **MITRE ATT&CK**.
- Built real-time dashboards to visualize attack patterns and accelerate detection, achieving **100%** detection rate in lab simulations.
- Automated ingestion of threat intelligence feeds using **Python** to enrich detection queries with malicious **IPs**, **domains**, and **file hashes**.

Personal Cloud Infrastructure Deployment (AWS) | AWS, ECS, Docker, VPC, IAM, S3

- Built a fully containerized web app using Docker and deployed it on **AWS ECS**, with an **ALB** and auto-scaling enabled to handle dynamic traffic loads.
- Implemented security best practices including **VPC** network isolation, **IAM** role-based access control, security groups, and encrypted **S3** storage.
- Set up automated **CI/CD with GitHub Actions** and **AWS CodePipeline**, along with **CloudWatch** monitoring and **GuardDuty** to track threats and anomalous activity.

Cybersecurity Portfolio Website | JavaScript, HTML, CSS · Live Demo

- Designed and developed a personal portfolio website to showcase projects in **cybersecurity**, **data**, and **cloud**.
- Implemented responsive design principles with **CSS Flexbox/Grid**, ensuring usability across desktop and mobile devices.
- Deployed using **GitHub Pages**, with continuous updates managed via Git.
