EDUCATION

Carleton University

Bachelor of Science in Computer Science

Ottawa, ON

Sept. 2022 – (expected) May 2026

TECHNICAL SKILLS

Languages: Python, SQL, Bash, Java, HTML/CSS

Frameworks: MITRE ATT&CK, NIST CSF, Cyber Kill Chain

SIEM Tools: Splunk, Elastic Stack

Security Tools: Wireshark, Sysmon

Networking: TCP/IP, DNS, HTTP/HTTPS, VPNs, Firewalls

Cloud Platforms: AWS, Azure

CERTIFICATIONS

CompTIA Security+

In Progress

CompTIA Network+

In Progress

EXPERIENCE

Data Analyst Intern

May 2024 - August 2024

Generac

- Analyzed and interpreted large datasets using **Python** and **SQL** to uncover trends and support data-driven decision-making across departments.
- Designed and built interactive dashboards in **Tableau/Power BI** to visualize **KPIs**, improving stakeholder understanding and reporting efficiency.
- Automated data cleaning and preprocessing workflows, reducing manual effort by **40%** and increasing analysis accuracy and speed.

Web Developer - Freelance

August 2023 - Present

Hirad's Web Services

- Implemented modern web technologies like **JavaScript**, **CSS**, and **HTML** to improve site loading speed, responsiveness, and accessibility, leading to better user engagement and higher search engine rankings.
- Increased traffic and clientele to businesses through **SEO**, driving up revenue.
- Integrated analytics tools like **Google Analytics & HubSpot** to track user behavior, enabling data-driven improvements that increased customer retention and conversions.

RECENT PROJECTS

Threat Hunting Dashboard | Python, Elastic Stack, Sysmon, Windows Event Logs

- Collected and ingested **Windows Event Logs** and **Sysmon telemetry** into the **Elastic Stack** for centralized analysis.
- Created and fine-tuned detection queries for suspicious process creation, privilege escalation, and lateral movement based on **MITRE ATT&CK** techniques.
- Built real-time dashboards to visualize attack patterns and accelerate detection, achieving **100%** detection rate in lab simulations.
- Automated the ingestion of threat intelligence feeds using **Python** to enrich detection queries with known malicious **IPs**, **domains**, and **file hashes**.

Personal Cloud Infrastructure Deployment (AWS) | AWS, ECS, Docker, VPC, IAM, S3

- Built a fully containerized web app using **Docker** and deployed it on **AWS ECS**, with an **ALB** and auto-scaling enabled to handle dynamic traffic loads.
- Implemented security best practices including **VPC** network isolation, **IAM** role-based access control, security groups, and encrypted **S3** storage for logs and backups.
- Set up automated **CI/CD** with **GitHub Actions** and **AWS CodePipeline**, along with **CloudWatch** monitoring and **GuardDuty** to track threats and anomalous activity..
